EXPERIENCE

Full Stack Developer FiveTwenty I.T. Services	Jun 2024 - Jun 2025 Alabang, Muntinlupa
- Developed and maintained enterprise systems including a company timekeeping system using TypeScript, React.js, Express.js, and PostgreSQL - Designed the system structure and key features, working on both front-end and back-end functionality - Worked with a team in an Agile environment, participating in sprint planning, debugging, QA, and code reviews.	
Freelance Developer Self Employed	2023-2025
- Designed user-friendly website layouts and UI/UX based on client needs using Figma, and built sites with Squarespace and Webflow - Developed full-stack web applications using React.js, Next.js, and React Native, handling both front-end and back-end functionality. Deployed and managed production-ready applications using Vercel - Implemented smooth, high-performance animations and interactions using GSAP and Framer Motion	

EDUCATION

CAVITE STATE UNIVERSITY BACOR CITY CAMPUS BACHELOR OF SCIENCE IN COMPUTER SCIENCE	2021-2025
- Dean's Lister - 4th Year & 3rd Year - President's Lister - 1st Year	
CENTRO ESCOLAR UNIVERSITY - LAS PINAS STEM (Science, Technology, Engineering, and Mathematics)	2019-2021
Graduated with Honors GPA: 93.27	

TECHNICAL SKILLS

- Languages:** HTML5, CSS3, SASS/SCSS, JavaScript (ES6+), TypeScript, Python
- Frameworks:** React, React Native, Next.js, Astro, Express.js, Prisma
- Databases:** Supabase, PostgreSQL, MongoDB, MySQL
- Styling, UI & Animation:** Tailwind CSS, Framer Motion, GSAP
- Tools:** Git, GitHub, Figma, Webflow, Canva, Squarespace, Postman

PROJECTS

PAYSERA TIMEKEEPING SYSTEM Tech Stack: MongoDB, ExpressJs, ReactJs, ExpressJs, Prisma, Shadcn	2024–2025
- Developed a corporate timekeeping system using the MERN stack and Prisma, managing employee attendance, work hours, and schedules for 40+ users, with a primary focus on frontend architecture and user experience. - Became the project manager, defining the system structure, core features, and frontend standards while coordinating implementation decisions.	
GREEN CYCLE (Freelance Project) Tech Stack: React Native, Expo, Zustand, Supabase	2025
- An offline-first mobile app designed to promote recycling awareness, allowing users to track and manage their recycling activities even without an internet connection. - Integrate data syncing between local and the cloud, with testing across Android and iOS using Expo Go.	
AUSSIE CUSTOM CARDS (International Freelance Project)	2025
- Designed and built the website using Figma and Squarespace, creating a responsive and user-friendly experience - Worked with an Australian client to align the site with their brand identity and business objectives	
DISCOVERU (Thesis Project) Tech Stack: MongoDB, Express.js, React, Typescript, SCSS, Python, OpenCV	2024 - 2025
- An automated checking system for standardized psychological tests, supporting both online assessments and physical test scoring via OMR (Optical Mark Recognition). - Integrated Python and OpenCV to handle machine learning workflows and OMR processing for scanned test sheets. - Developed the frontend using React.js with TypeScript to ensure high-quality code and a smooth user experience.
